

TRI-STATE
SODA BLASTING
 MOBILE CLEANING & PAINT STRIPPING
 330 North Greeley Ave.
 Chappaqua, NY 10514

THE SODA BLAST PROCESS

This new paint stripping technology eliminates toxic cleaning chemicals. It cleans multi-layered surfaces to any level desired and can be used while most machines and processes are in operation. It is a safe, portable, wet or dry, non-abrasive stripping process.

The soda blast media is a **specialty formulated sodium bicarbonate** -- baking soda. This non-toxic, food-grade material is

100% water soluble and environmentally safe.

Soda blasting uses compressed air to propel the media onto the area to be cleaned. When the media comes in contact with the contaminant on the substrate, the sodium bicarbonate particles explode.

The resulting release of energy disrupts the contaminate surface leaving the substrate completely unaffected.

Other processes, such as sand blasting, damage the underlying surfaces.

They tend to cause "oil-canning" -- a destructive warping or bending of the substrate.

TRI-STATE SODA BLASTING

MOBILE CLEANING & PAINT STRIPPING

FASTER! SAFER! COST EFFECTIVE!

Tri State Soda Blasting Mobile Unit

Soda Blasting is a revolutionary cleaning technology that uses a non-destructive abrasive and eliminates environmentally hazardous chemicals.

Soda blasting can be used wet or dry to remove paint, corrosion, biological contaminants, oil, grease, carbon, and many other coatings.

PERFECT FOR THESE APPLICATIONS AND MORE!

- BOATS
- FOOD SERVICE
- CARS
- TRUCKS
- AIRPLANES
- GRAFFITI
- MASONRY
- RUST
- STAINS
- CONVERTER SYSTEMS
- RAIL CARS
- FIBERGLASS
- MACHINERY
- OIL & GREASE
- ENGINE PARTS
- FIRE DAMAGE
- MOLD REMEDIATION
- MONUMENTS
